Reality check

From the sources

The work

- CSIR and UGC fellowships are for research under faculty or scientists in university departments, national laboratories and institutions, and the joint test's fellowships are accepted at universities, IITs, colleges, government research establishments and recognised industrial R&D units.
- The day-to-day research is not described in these pages.

Entry requirements

- The Joint CSIR-UGC NET December 2026 bulletin asks for 55% (50% for OBC-NCL, SC, ST, PwD and Third gender) in a Master's degree or equivalent, and final-year students may apply
- A four-year bachelor's route needs at least 75% aggregate.
- The upper age limit is 30 for JRF and none for Assistant Professor.
- UGC-NET covers other subject groups with the same marks rule.

Trade-offs to consider

A fellowship does not guarantee a job afterwards, the number of fellowships per subject is limited and changes from cycle to cycle, and a JRF may stay at the first-stage stipend or be terminated if the expert committee does not recommend an upgrade.
